The relationship between soil water potential and water content is predominantly determined by soil texture (Saxton et al., 1986). Soils with a clayey or silty (loamy) texture have a higher water content than sandy soils (Saxton et al., 1986), resulting in a more favourable plant growth regime for clayey and silty (loamy) soils. In addition ...

Landscape potential for the adoption of crop cultivation ...
When you camp at the water's edge, there is always something going on. The beach is close by, just like the playgrounds and the bouncing castle. The pitches are a generous size of at least 125 sqm each and they all have electricity. If required, you can opt for a pitch with water supply and drainage or water tap. Dog camping area
