Understanding Assessment in Counselling and Psychotherapy ...

The practice of assessment entails the collection of information in order to identify, analyze, evaluate, and address the problems, issues, and circumstances of clients in the counseling relationship. Assessment is used as a basis for identifying problems, planning interventions, evaluating and/or diagnosing clients, and informing clients and stakeholders.

CHAPTER 1 The Role of Assessment in Counseling

Underpinning the process of assessment in counselling and psychotherapy is the desire to find " a useful balance by considering both a pathological approach (focussing on what makes people unhealthy) and a salutogenic approach (focussing on what makes people healthy) for understanding clients and their problems. (Kleinke, 1994. P.195)

The importance of assessment and decision making ...

Assessment is the process by which counselors gather the information they need to form a holistic view of their clients and the problems with which they present. As a counselor, you will regularly assess your clients throughout the counseling process, especially in the early stages.

Introduction to Counseling Assessment LEARNING OBJECTIVES ...

This paper reports on a consultation exercise undertaken with 18 experienced counsellors on how they make client assessments. These practitioners expressed a high degree of consensus on the purposes of assessment making (to reach a shared understanding with the client about their willingness and ability to undertake a shared therapeutic journey) but the way in which they approached the task varied according to the theoretical orientation they acquired during training.

How do counsellors make client assessments?: Counselling ...

A psychological assessment can include numerous components such as norm-referenced psychological tests, informal tests and surveys, interview information, school or medical records, medical evaluation and observational data. A psychologist determines what information to use based on the specific questions being asked.

In practice, counseling psychologists try to gain an understanding of how each individual thinks, feels, and acts, and their assessment practices cover the entire range of human cognitive, conative, and affective attributes.

Counseling Psychology Assessments - IResearchNet

It's an important rule that every ethical and professional counsellor performs an assessment with their client before individual counselling commences (see also: Counselling for Individuals). An assessment for counselling is where a client and counsellor both work together in order to decide if continuing for further counselling sessions together is a good idea.
